

Our Core Competence

Scott & Fyfe offer the following products and services from their UK Operation.

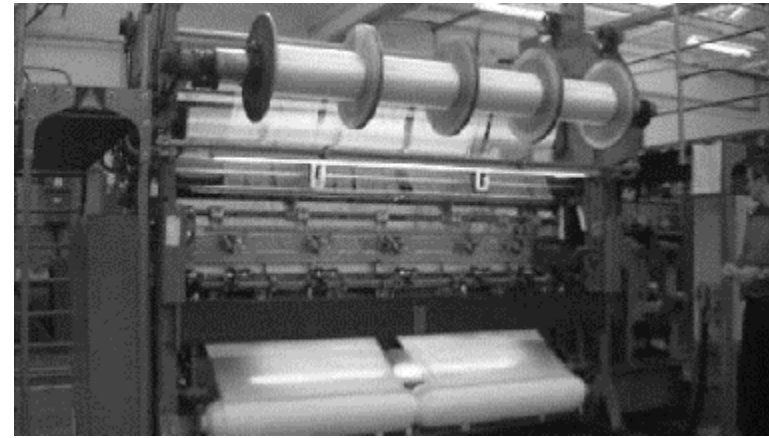

Stitch Bonding

Our expertise in stitch bonding allow for quick and effective prototyping - turn your ideas into reality.

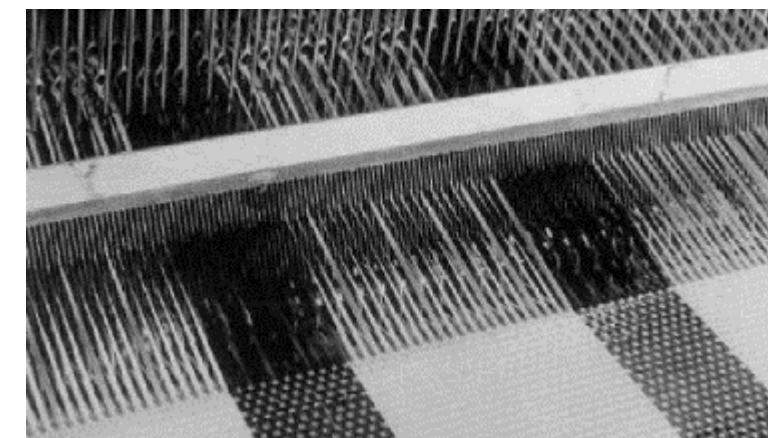

Extrusion Coating

We have many years experience with high-speed coating.

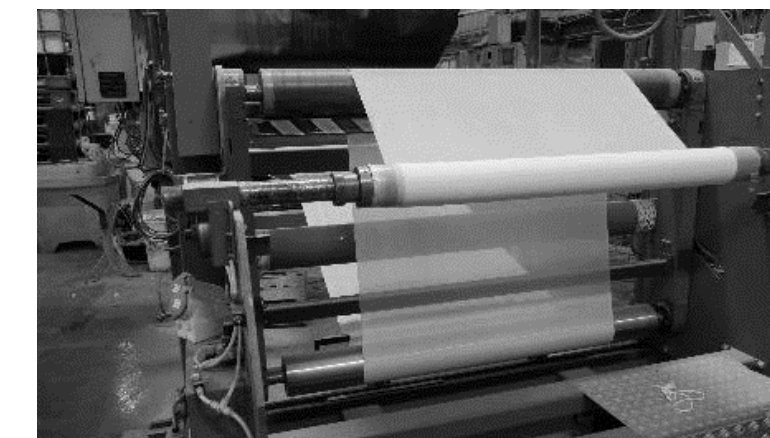

Knitting

Our knitting machines can be modified to suit the needs of your business.

Weaving

Our ability to produce woven material allows us to excel in markets such as agriculture.

PVA Coating

We have many years of experience in high speed coating and lamination.

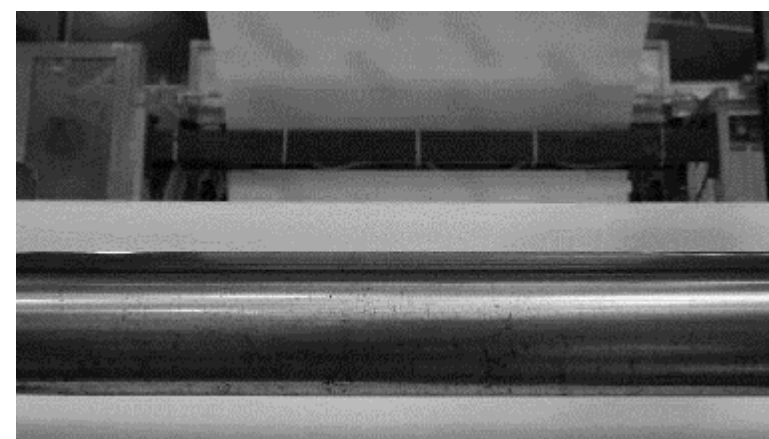

Cutting and Packaging

Our ability to cut to size makes for a quick and easy application.

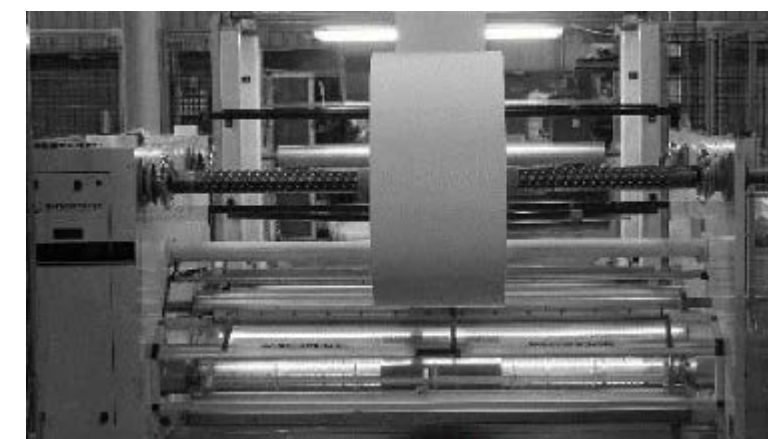

Extrusion

Our extrusion line can spin many different polymer yarns to best suit your application.

Creping & Printing

Our creping & printing facilities offer a range of solutions for a multitude of applications.

Slitting

We offer accurate, clean and logistically compatible slitting services to a global market.

Factoring

We understand that in a highly competitive market low-cost, quick-to-market products and solutions are essential.
